

# THINKING QUOTIENT FOR FUTURE MINDS

With rigorous discipline and a thorough faculty, Galgotias is the destination of choice

© Mr. Suneel Galgotia, Chancellor of Galgotias University

even at under-graduate level.

Recently, NASA recognised Galgotias' talent by selecting the Moon-Buggy designed by Galgotias student's for permanent exhibit at the NASA Marshall Space Centre, Alabama, USA. What is more creditworthy is that NASA has selected Galgotias among five Universities from across the globe and Galgotias is the only private university to be selected from India.

## How do you ensure quality in terms of student enrolment and quality faculty?

Galgotias University has emerged as the institution of choice for high calibre students pursuing higher studies. We are working today so that the thought seed of tomorrow is nurtured well. To ensure this, we take students of good merit only, like in the case of engineering, students with less than 85%(PCM) do not qualify for admission at Galgotias University. Diligent students with a serious bent of mind are drawn to the global level educational facilities at Galgotias University.

High quality intake applies to the faculty too. The basic qualification for teaching here is a Ph.D., so that even first year students are taught by Ph.D. level faculty who have studied and taught in institutions of excellence across the world. All faculty have to be the best in their respective fields and from the finest academic institutions across the world, so as to embody world-best educational practices and a never-before learning experience for the students.

## What differentiates Galgotias University from other universities?

Galgotias University has been founded with a vision to create a thinking ecosystem for the education of outstanding students such that they emerge as intellectually, socially and spiritually evolved global leaders.

Galgotias Educational Institutions is not merely an organisation. While both institutions and organizations need great human and physical infrastructure, an institution is an edifice built on the foundations of better thought and deeper values.

Galgotias University grooms its students to rigorously acquire a discipline and equips them with the ability to apply it, to excel in all situations. We call this Thinking Quotient and it is this that differentiates Galgotias University from all others.

We are able to bring the best of educational practices from across the globe because we are not bound by moribund legacy systems and we look to a glorious educational future for the country.

## What global advantage is Galgotias University bringing to India?

We have put a number of global level academic building blocks into place to ensure that Galgotias University serves as a beacon of excellence for all to emulate.

We believe only the finest minds can shape the best minds of the future, for life. Which is why Galgotias University's global-level faculty comprises the finest academic minds drawn from Purdue University, Georgia Tech, Oakland, Arkansas State University & National University Singapore. To augment our quest for academic excellence, we have put in place a

basket of international pedagogies right from the beginning. These bring out the best in every student and enable students to maximise their potential. One of these is the Fully Flexible Credit System that enables Galgotias University students to pursue liberal arts subjects like music, fine art & theatre along with disciplines such as engineering and management, in line with [stude.PunjabColleges.com](http://stude.PunjabColleges.com)ests.

## What enables Galgotias to get 100% placements?

Continuing with the academic building blocks, Galgotias industry-led syllabus enables comprehensive student training, industry-relevant project support, industry visits and internships, hands-on technical and soft skills training. Extensive interaction with domain experts ensures the absolute job-readiness of each student. The power and relevance of industry-led syllabi drive academic excellence among the Galgotias faculty and students, thereby enabling industry leaders to recruit at Galgotias year after year. Industry and media surveys reveal placements of 100% every year. Key recruiters like Infosys are recruiting in ever-greater numbers every year because they see huge growth in the quality of Galgotias students.

## How important is research and development at Galgotias University?

Our Thinking Quotient is supported with Galgotias University's research-driven education, huge laboratory infrastructure and dedicated research-oriented faculty with a proven track record of instilling a research culture in the students' body right from year one. It ensures an R&D mindset
